JAWS
SCREEN READER

Freedom Scientific
A VISPERO™ BRAND

JAWS is a powerful accessibility tool for blind computer users

---

JAWS is a screen reader for computer users of Microsoft Windows whose vision loss prevents them from seeing screen content or navigating with a mouse. JAWS provides speech and Braille output on your PC.

License options are available for professional and personal use. Home users in the US may also purchase self-managed (non-commercial use) annual licenses.

Get started quickly with dozens of voices included for free, a useful quick start guide, and built-in INSERT + F1 help making it easier for beginners to get started learning basic keystroke commands.

JAWS enables people with vision loss to independently use a computer with a keyboard, speech, and/or a Braille display. With JAWS, you can navigate the Internet, create documents, spreadsheets and presentations, email correspondence, and much more from your office, remote desktop, Citrix, and from home. Visit our website to discover JAWS Headquarters - a free, online learning resource.
