

MAGic® *Large Print Keyboard*

Productivity Keyboard for Low Vision

Features at a Glance

- Bold, high-contrast keys
- 22 specialized keys for instant access to MAGic's most-used features
- Unique scroll wheel for changing magnification levels on the fly
- Quickly and easily adjust reading speed
- Tailor the on-screen appearance as needed for different tasks
- Easily re-assign keys to match personal preferences
- Create one-touch access to applications, documents, Web pages, and Windows® commands

Easy to See

The MAGic Large Print Keyboard provides low vision users with an easy-to-read keyboard with dedicated MAGic feature keys, making learning and using MAGic easier than ever. The bold, high-contrast keys provide fast, accurate typing with less of the eye fatigue experienced when straining to locate keys on standard keyboards.

Single-Key Access to all of MAGic's Most-Used Features

MAGic's most-used functions are pre-assigned to single keys, providing quick access to these features. Press a single key to launch MAGic. Quickly zoom out to 1x to check your formatting and then return to your working magnification level. Toggle on and off visual enhancements for mouse, cursor, and focus tracking. Adjust reading speed on the fly. Control all these features and more with the 22 specialized keys.

Built-in Controls for Dual Monitors

The Toggle Monitor and View Locking keys improve productivity for MAGic users who are simultaneously working with different applications in two independent monitors.

MAGic[®] Large Print Keyboard

Productivity Keyboard for Low Vision

Keys Reserved for User Assignment

The keys, M1, M2, and M3 have been intentionally left unassigned, allowing individual users to assign them to their favorite MAGic functions. They can also be assigned to user-created shortcuts and Windows commands available in the MAGic Keyboard Manager.

Benefits JAWS[®] Users

While the keyboard is designed to enhance functionality for MAGic users, it is also designed with JAWS users in mind. MAGic keyboard keys have already been assigned in JAWS to features such as adjusting speech rate and bringing up the Links List and the Research It tool. Other MAGic keyboard feature keys can be assigned JAWS functionality through the Keyboard Manager.

Requirements

- USB Connection
- MAGic 11 or above, or JAWS 12 or above
- 64-bit or 32-bit versions of Windows 7, Windows Vista, Windows XP, and Windows 2008 Server; or 32-bit versions of Windows XP and Windows 2003 Server

Work longer with color enhancements that match your vision by reducing screen glare and increasing the contrast.

The colored cursor stands out against the document text, drawing your eye to the cursor location.

Easy access to most-used features makes learning MAGic a snap
