- 2-hour in-use battery life
- Uses rechargeable or disposable AAA batteries

Crisp and Clear Magnification Wherever and Whenever You Need It

For the many people who need help reading text and seeing details because of low vision, traditional magnifying glasses work only up to a point. The RUBY takes handheld magnification to the next level and beyond.

The RUBY’s full color, high brightness video screen makes it outstanding for magnifying bills, mail, receipts, and checks. It easily slips into a pocket or purse as the perfect traveling companion for visiting the grocery store, pharmacy, bank, library, restaurant, or anywhere else. And it’s quick and easy to operate, with bright, colorful push buttons.

Lay the RUBY flat on a surface, or unfold the handle and use it like a standard magnifying glass and see everything with enhanced contrast and NO DISTORTION. Read as fast as you want. The screen image stays crisp and clear, even when rapidly moving the RUBY across lines of text – no motion blur.

Change the text and background color combinations to suit your most comfortable reading. The RUBY features full color mode and four enhanced contrast modes for reading.
